BUSINESS CTF 2023: THE GREAT ESCAPE

Eighty years ago, the earth faced a crisis like never before. Fossil fuels had been exhausted, water was scarce, and power a luxury. In a world filled with darkness, tensions began to rise between nations, and the once united global community split into two power states, each vying for control, power, and survival. These 80 years of dispute stayed in history as the Dark War.

Now, 16 years after the armistice, warfare is about to re-emerge. Scientists have confirmed the existence of Vitalium, an alternate power source, on Mars, and the

two states are now racing to establish a colony on the red planet. A ruthless competition of hacking and cyber-attacks has begun, and both sides are trying to damage and exploit each other's infrastructure.

*You're part of the United Nations of Zenium, and your state wants to create a democratic colony where Vitalium will be used to make humanity healthy again. Your opponent is the Board of Arodor, a strict dictatorship that wants to ensure only the elite can get a second chance in life. **Win and escape the planet or fail to survive.***

Are you ready to join our team of sponsors for The Great Escape?

What is it?
A free, fully gamified, online Capture The Flag cybersecurity competition for companies powered by Hack The Box. The CTF will feature balanced content across all difficulties, from easy to hard level, and a wide range of content types (Full Pwn including Windows, Linux and Active Directory, Web, Forensics, Reversing, and much more), simulating real-world scenarios. The content is themed so all players will experience the story being revealed as they hack. What is the theme? Check above!

Why sponsor?
Sponsoring the event gives you the opportunity to increase your brand presence amongst our global talent pool of cybersecurity and IT professionals. Also, associating your brand with the only hacking competition for companies proves that you have a security-first mindset and you are in touch with the latest cyber trends.

> *Amazing experience working with HTB! Not only it is a very complete and fun hacking learning platform, but also the team is full of talent and creativity and will support your CTF setups in a very professional way. I'm looking forward to continuing this great collaboration.*
