# DATA SECURITY MEASURES

You should download a copy for future reference.

This document outlines the organizational and technical measures that constitute Hack The Box's Data Protection Framework, in compliance with international standards, Article 32 GDPR and other applicable laws requirements, ensuring appropriate safeguards for data protection.

Where applicable, this document serves as the relevant Annex to the Standard Contractual Clauses and the [HTB DPA](#) or other Data Processing or Data Sharing Agreements. For further information, visit our [Trust Center](#).

Measure	Description
<b>Access Control</b>	Role-based access, least privilege enforcement, VPN, MFA, and SSO.
<b>Physical Security</b>	Electronic access systems, CCTV monitoring, fire suppression, power redundancy.
<b>Change Management</b>	Structured change approval process with risk assessment and documentation.
<b>Logging &amp; Monitoring</b>	Automated tools for real-time system tracking, anomaly detection, and forensic logging.
<b>Security Assessments</b>	Regular vulnerability scans, penetration testing, and code reviews.
<b>Antivirus/Anti-malware</b>	Endpoint protection with behavior-based detection and automated threat response.
<b>Incident Management</b>	Structured process for detection, reporting, and resolution of security incidents.
<b>Business Continuity</b>	BCP and DRP with regular testing, backup strategies, and rapid recovery protocols.
<b>Backup &amp; Restore</b>	Encrypted backups, integrity checks, and routine restoration testing.
<b>Asset &amp; Device Security</b>	Mobile Device Management (MDM), encryption, and policy enforcement.
<b>Data Management</b>	Classification, encryption, access control, and retention policies.
<b>Application Security</b>	Secure Software Development Lifecycle, patch management, and vulnerability assessments.
<b>Third-Party Security</b>	Supplier security vetting, contractual compliance, and risk-based monitoring.
<b>Personal Data Protection</b>	GDPR-aligned principles, privacy controls, and cross-border data transfer safeguards (Adequacy Decisions, SCCs, IDTAs).
<b>Training &amp; Awareness</b>	Employee security training, phishing simulations, and awareness programs.
<b>Audit &amp; Compliance</b>	Internal and external audits for regulatory compliance verification.
<b>Review &amp; Approval</b>	Annual policy updates aligned with evolving regulations and business needs.
<b>Certifications</b>	ISO 27001, ISO 27701, SOC 2 Type I, Cyber Essentials, ISO 9001.
