

# SHERLOCKS

## DEDICATED LABS

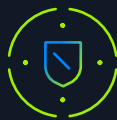

Introducing Sherlock, a dedicated category of defensive content within Hack The Box Dedicated Labs.

Safeguard your organization's assets and respond swiftly to potential threats, with multiple threat awareness exercises, from **Digital Forensics & Incident Response**, to **Threat Intelligence and Reverse Engineering**.

### Engaging realistic scenarios:

Experience hands-on simulations that mirror real-world cybersecurity incidents, providing an authentic learning experience.

### Enhanced defensive skills:

Strengthen digital forensics and incident response (DFIR) capabilities, and improve the ability to prioritize and analyze real-world investigations.

### Purple team approach:

Break down traditional silos by encouraging a purple team approach, enabling offensive teams to acquire practical skills in the defensive space.

# Crack the case. Fortify your defense.

### EMPOWER:

Strengthen detection, containment, and response capabilities for efficient incident handling.

### OPTIMIZE:

Increased efficiency and cost reduction with streamlined security incident management.

### INFORM:

Enhance organizational threat awareness to make informed decisions.

### DEFEND:

Minimize the risk of attacks through effective incident response strategies.

Elevate your team's capabilities with Sherlocks, an innovative expansion within Dedicated Labs. Unleash targeted learning solutions and tailored upskilling exercises that **empower your team working in defensive roles, propelling them to the next level of expertise.**
